Application No. 10/069,978
Docket No. 742111-133REMARKS

The Notice of Drawing Inconsistency required that the inconsistency between the presence of Figs. 5a & 5b in the drawings and the absence of a description thereof in the brief description of the drawings be corrected. That has been done by the above amendment to the specification which adds a description of Figs. 5a & 5b to the brief description of the drawings. Therefore, further process of this application toward printing of the patent is now requested.

Respectfully submitted,
